“As a producer of metro, trams, trains, and electric trams and buses, Bozankaya will determine specifications and requirements for heavy duty vehicles in works package 1.

In this way, Bozankaya will have the task of identifying requirements for manufacturing universal battery pack.”

About Bozankaya

Bozankaya was founded in 1989 as an R&D company in Germany. The company expanded to Turkey in 2003 and became a strong domestic brand by strengthening its R&D investments in the past years.

Our priority is to provide quality and consistent responses to our customers' demands and we do not compromise on quality. Bozankaya started out in Turkey with 20 employees and has now reached approximately 1,200 employees, including nearly 130 R&D engineers in the R&D Center.

Bozankaya, Turkey's leading company in the field of transportation technologies, produces electric buses, trolleybuses, trams and metro vehicles, which are new generation, environmentally friendly, %100 domestic engineering products that it has designed and licensed.

We have been recognized as an R&D Center by the Ministry of Industry and Technology since 2015. Bozankaya is supported and financed by the Scientific and Technological Research Council (TÜBİTAK) and HORIZON Europe in many projects, railway vehicles. Bozankaya has developed 34 R&D projects between 2012-2022 and continues to prepare new projects.
