and scalable soliD state batteries system

“Within EXTENDED project, our mission is to perform the supporting sustainability studies for the design, manufacturing, and recycling of environmentally and economically sustainable SSB in a holistic perspective.

Through Life Cycle Sustainability Assessments, we identify environmental, social and economic hotspots which greatly affect the final performance.

Our work is key in advancing sustainable solutions for a brighter and greener future.”

About INEGI

INEGI – Institute of Science and Innovation in Mechanical and Industrial Engineering is a Research and Technology Organisation (RTO), founded in 1986, focused on research and technology-based innovation activities, technology transfer, consulting and technological services, oriented to the development of industry and economy in general.

A non-profit, private and recognised as a public utility entity.

It has in its base a cluster of research units specialised by scientific and technological areas supporting the research activity. Crosswise there are the Innovation, Consulting and Services activities that address the development of solutions for companies.

EXTENDED project has received funding from the European Union's Horizon Europe research and innovation programme under Grant Agreement No 101102278.
